RE: BAY WIND FIELD OPENS CEDIF OFFERING

The Bay Wind Field Inc. (Bay Wind) a CEDIF, is pleased to announce its **seventh offering of shares, to begin on the 24th of January, 2011**. Since inception, The Bay Wind Field has raised over \$1 million investment dollars, and has in excess of 160 investors.

Bay Wind is currently looking for the participation of new investors, as well as additional share purchases by existing Bay Wind investors in order to allow the company to take advantage of exciting new opportunities announced by the Nova Scotia Government to “Encourage Community – Based Renewal Projects which includes the “Community Feed in Tariff” (COMFIT) for Wind turbines electricity production.

To date Bay Wind Field has invested in such companies as Scotian Wind Fields, a rapidly developing Nova Scotia company in the wind generation industry, and Renewable Energy Services Ltd. (RESL), also a Nova Scotia company with completed projects within the province, including the successful Digby turbine project in which Bay Wind played a fundamental and important initiative role. These are two examples of investments made by Bay Wind supporting industry within the province. A local example can be found in the assistance to a local company in achieving the development of a successful venture in the production and sale of wood fuel bricks for use in fireplaces, heaters and furnaces from what was previously wood waste.

These investments and others as well as any future investments made by Bay Wind on behalf of its shareholders, not only encourages the successful development of Nova Scotia industry, but ensures that investment dollars earned in Nova Scotia, remain within the province to encourage increasingly important industry growth and employment within our province.

The offering is for \$1.00 (one dollar) per share with a minimum investment of \$500 (five hundred dollars), more information on the contacts can be obtained from the Bay Wind Website.

The Bay Wind Field Inc. is an independent, community owned corporation which has been raising capital through the Community Economic Development Investment Fund (CEDIF) program in Nova Scotia since 2002. The CEDIF program affords Nova Scotian taxpayers attractive incentives for investing in Nova Scotia companies with a 35% provincial tax credit against provincial taxes payable.

Bay Wind's primary investment focus is in the area of: specific wind power projects, wind power companies, exploration and development but is also analyzing emerging business opportunities related to carbon emissions reduction, such as tidal and solar power, hydrogen and renewable co-generation.

More information about The Bay Wind Field, our partners, and the CEDIF programme and investing is available at:
